SUNIL A M

Chikkamagaluru, Karnataka

(+91) 9110855363 sunilswathi84@gmail.com sunilmanjunath28 Sunil AM

Professional Summary

Computer Science undergraduate with hands-on experience in Full Stack Development using React, Spring Boot, Node.js, and MySQL. Proficient in designing RESTful APIs, implementing secure authentication systems, and building responsive web applications. Strong foundation in Java, JavaScript, and database management with experience in developing scalable end-to-end projects. Seeking an entry-level Full Stack Developer role to contribute technical skills and grow in a dynamic organization.

Skills

- **Programming Languages**: Python, Java, C
- **Frontend**: HTML, CSS, JavaScript, React
- **Backend**: Spring Boot, Node.js, RESTful API development, JWT Authentication
- **Database**: MySQL (CRUD, Joins), MongoDB
- **Tools**: Git, GitHub, VS Code, Postman, Firebase
- **Concepts**: OOPS, Data Structures

Education

Bahubali College of Engineering **Aug 2022 – Jun 2026 (pursuing)**

B.E. in Computer Science, CGPA: 8.2 *Shravanabelagola, Karnataka*

Govt PU College, Chikkamagaluru **May 2020 – Jul 2022**

Pre-University, Percentage: 64.5% *Chikkamagaluru, Karnataka*

Projects

Blockchain & AI Powered Healthcare Management System

- Developed a secure healthcare management system using blockchain technology to ensure tamper-proof storage of electronic medical records.
- Integrated AI-based predictive models to analyse patient health data and generate disease prediction insights.
- Designed backend modules for patient registration, appointment scheduling, and medical record management.
- Implemented role-based access control (RBAC) to ensure data privacy and authorized access for doctors and patients.

E-Commerce Web Application – Shop Kart

- Built a full-stack e-commerce platform using React and Spring Boot for efficient product and user management.
- Designed and implemented RESTful APIs for authentication, product listing, and CRUD operations.
- Integrated MySQL database for secure storage and retrieval of user and product data.
- Implemented authentication and authorization mechanisms to ensure secure user access.

Online Meeting Web Application

- Developed a web-based virtual meeting platform enabling users to create and join secure online sessions.
- Implemented user authentication and meeting management APIs using Spring Boot / Node.js.
- Built responsive frontend using React to provide an intuitive user experience.
- Integrated real-time communication functionality to support seamless participant interaction.

Online Job Portal

- Developed a full-stack Job Portal application using React, Node.js, Express, and MongoDB to streamline recruitment workflows.
- Designed RESTful APIs with JWT-based authentication for secure login and role-based access control.
- Built dynamic dashboards for job seekers and recruiters with job posting and application tracking features.
- Implemented resume upload functionality and optimized MongoDB schema for efficient data management.

Achievements

- Successfully developed and deployed multiple full-stack applications integrating frontend, backend, and database systems.
- Designed secure authentication and role-based access systems across projects.
- Improved understanding of system architecture through independent project development.
- Actively practiced problem-solving and strengthened coding skills through continuous hands-on implementation.
